Pricing, Free Trial, and Billing

Access to the functionality required to create and host events on ShortVibe is offered on a subscription basis.

ShortVibe offers a seven (7) day free trial. A valid payment method is required to start the free trial. No charges are made during the free trial period.

By starting the free trial, the user requests immediate access to the service and acknowledges that, unless the subscription is cancelled before the end of the free trial period, the subscription will automatically convert into a paid monthly subscription.

Unless cancelled before the trial ends, billing will automatically begin immediately after the free trial period. The subscription fee is USD 15 per month and is charged on a recurring monthly basis.

Payments for paid subscriptions are processed by a third-party payment provider acting as the merchant of record. For the purposes of payment processing, invoicing, and tax compliance, the merchant of record is Polar (operated by Polar Software, Inc. or its affiliated entities). Polar is responsible for charging users, collecting applicable taxes, and issuing invoices or reverse invoices in accordance with applicable law.

ShortVibe does not process payments directly and does not issue invoices to users.

Subscription fees are non-refundable. No refunds or credits are provided for partially used subscription periods, unused time, or cancelled subscriptions, except where required by applicable law or as otherwise determined by the merchant of record.

Users may cancel their subscription at any time. Cancellation prevents future billing but does not entitle the user to a refund for any amounts already charged.

Any change to the subscription price will apply no earlier than the next billing period and will be introduced only after the user has been informed in advance and has provided consent, where required by applicable law.

Acceptable Use Policy

Users may access and use the ShortVibe platform only in compliance with these Terms, applicable law, and all instructions provided through the platform.
